

Personal Device vs Corporate Device

Option 1: Use your personal device

Pros

- You don't have to charge and carry two separate phones
- You get an extra \$15 in your pay each fortnight
- You have the flexibility to install your own applications
- Your phone is secure, with a Touch ID, Face ID or a 4-digit pin enabled
- You get to use your own device!

Cons

- You can't use an Android over 4 years OR an iPhone 6s or older
- If you share your phone with others, they could access data

Option 2: Use your corporate device

Pros

- Company data won't take up space on your personal phone
- Your work and personal information is on separate devices

Cons

- You can't install your own applications.
- You must charge and carry two devices around with you
- You cannot choose your device, you must accept what is provided
- You must wait for your corporate device to be issued
- You won't get the extra \$15 in your pay each fortnight
