**Setup your
corporate device**

Android

Please read before enrolment!

Remove the phone and charger from the box and begin charging the phone as the device's battery is unlikely to be fully charged. The enrolment process can be performed while the device is charging.

The enrolment process may take between 15-30 mins and requires access to mobile internet data. This can be done using the 3G / 4G / 5G data on the SIM card. Please do not use the Endeavour Foundation Corporate or Guest Wi-Fi.

As part of Endeavour Foundation's data security measures, you will be required to setup an access (PIN) code for the device. You will need to nominate a 4-digit code during the process.

While these instruction steps are for new Samsung Android devices, they can be loosely followed for other older Android devices issued by Endeavour Foundation.

You will need to enter your Endeavour Foundation username and password a few times when prompted. This is normally your Endeavour Foundation email address but contact ICT Service Desk on 1300 742 212 to confirm if you are unsure!
