

CONVERGE INTERNATIONAL

# The future of health and wellbeing is here.

Converge International is excited to announce the launch of our new Converge App.

We know EAP can work harder and smarter for you, and the future lies in harnessing technology and data to engage employees early and more often.

Together with HeadUp Labs, our expert, global digital partner, we have created a new digital health and wellbeing platform. So now your people can use our app for more than just appointment booking and take control of their wellbeing from the palm of their hand.

## THE CONVERGE APP (INCLUDED AS PART OF YOUR EAP PROGRAM) NOW DELIVERS:

- Appointment booking
- Health metrics tracking and personalised human dashboard
- Health Insights library
- Employee support (FAQ's and e-mail support)
- Aggregated reporting to help you understand the shifting of wellbeing trends of your people as they engage with the app.
- To maximise downloads and really kick things off, ask about launching the app with **Converge Move**.

**Converge Move** is a team-based, physical activity challenge that's guaranteed to get your people connected and on the path to good health. It's completely **free** to Converge customers for the next 12 months. It's sure to get your people moving and excited about using the app.

## COMING SOON

**Converge Life** is a personalised and fully integrated wellbeing solution leveraging the power of data science and real time monitoring. It builds on the functionality and success of the Converge App, but will deliver so much more.

Finally, EAP and wellbeing can work like they should – together and for everyone. Now that's Care Made **Real!**
