

Safety first

Protect yourself when you're connected

Turn on privacy settings

- Take control of how companies use your data by enabling privacy features.

Create strong passwords

- Use passwords that are hard to guess.
- Change your default wifi passwords.

Your device is your responsibility

- Lock devices when not in use.
- Store devices safely.

Think before you post

- Avoid posting sensitive and personal information online.
- Try not share too much information either.

Be careful what you download

- Don't download content from sites that are not trustworthy as these may contain malware.

If in doubt, send the email to ICT Security via the
#TeamPossible Support Hub.
