

AFTER your device is upgraded to Windows 11

Please complete a few simple checks to ensure your device is working optimally.

Restart your machine (this must be done at your office or site)

Set up Windows Hello to choose your login preference

Check your headset, screens, mouse and keyboard work correctly

Use the VPN icon on your desktop while onsite

The technician will support you to do this during your upgrade

Activate-VPN

Open and test your applications (Teams, Outlook etc)

Check files and folders are still available

Check out the Windows 11 User Guide [here](#)

You're all set and can resume working as normal
